

Aug. 1, 1872

Dear Dr. Allen

Thanks for the
photo, which goes into
my large collection

I wish I had had
your list of great, small
plants a while ago.

I had a vast lot of
Indian & other plants
to ~~put~~ collect for the
Hunter & when done
I got the dupl. out of
right at once - these
were mainly sent off
to Jersey. An excellent
Capparis minor.

Bixa & the like were
surely among them —
on anything that Dr.
J. May does not want
but send further on.
Now I advise you to
apply to him & search
search the hands to
for some of them.

As we go on — for
Caryophyllae — yet to do —
we will look out for
you — at least I will
tell G. Wright to do so,
& use your list.

I sent to Erythraean
& to Eotian specimens
of *Cassia argentea*

of my own collection in
Egypt.

I am so glad
you can not hold
of the silence intended —
plea — (also the *Synonimia*)
I'm 1st for send: then
for notes. & stir up
Dr. Ritchie

We will help you
as far as we can in
getting Medical-pl.
herbarium. — Let us know
when we can. There
are things occasionally
we could have dried in
a number of specimens
Ever truly
A. Gray
